Sable Offshore Corp. Statement on Santa Barbara County Permit Transfer

SANTA BARBARA, CA —Sable Offshore Corp. (“Sable”) submitted a letter to Santa Barbara County Friday regarding the change of owner, operator and guarantor permits for the Santa Ynez Unit, POPCO Gas Plant, and Las Flores Pipeline System.

Sable Vice President of Environmental and Governmental Affairs Steve Rusch offered the following statement on the letter:

“The Santa Barbara County Planning Commission approved the change of owner, operator and guarantor last fall. In addition, Santa Barbara County Board of Supervisors considered the transfer and voted 2-2, which affirmed the Commission’s decision. The law is clear the Planning Commission approved the permit transfer, which is why we’ve asked the County to transfer those permits without delay. Should the County fail to do so, Sable will ask a court to intervene.”
