Santa Ynez Pipeline System: Fully Repaired & Upgraded

SABLE OFFSHORE

Key Pipeline + California Oil Facts:

Fact #1: California is an energy island; no pipelines bring crude oil into California.

Fact #2: California imports over 60% of its crude oil from foreign nations; over 75% is sourced from outside of California (2025 data).

Fact #3: Santa Ynez crude oil is 4 times cleaner than imported oil (CARB Annual Low Carbon Fuel Standard Report).

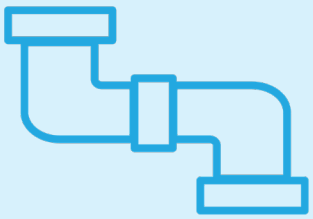
Fact #4: Sable invested hundreds of millions of dollars to upgrade every aspect of the Santa Ynez Pipeline System.

The Pipeline

Key to supporting California's energy independence, this pipeline system begins on the Outer Continental Shelf, then runs hidden along the coastline for 10 miles, then inland 113 miles into Kern County.

Pipelines =
Safest Mode of Transport =
Better for our Environment*

*According to PHMSA and the Liquid Energy Pipeline Association



Safer than

Sable is dedicated to protecting the community and the environment.

Hidden underground, the Santa Ynez Pipeline System is not visible along the Gaviota Coast.

Santa Ynez Pipeline System: Safe, Reliable Energy Solution for California

Extensive Pipeline Improvements on Segments 324 and 325

- >$200 million invested in pipeline safety
- All required repairs completed
- 24/7 advanced monitoring systems with enhanced leak detection
- Installed 27 additional emergency shutoff devices
- Integrity inspections performed twice a year (previously once every five years)
- Successfully hydrotested pipeline above normal operating pressure
- New state-of-the-art Control Room with continuous real time surveillance
- Enhanced cathodic protection to inhibit corrosion

Sable Team = Experienced Operators:

- Award-winning safety record
- Trained to respond to any incident
- Average 20 years of oil & gas experience

Working with Local, State and Federal Agencies to Ensure Safe Operations

Sable works with local, state and federal regulators on audits, inspections and drills. The Santa Ynez Pipeline System is held to higher safety standards than any other oil pipeline in California. Safety and compliance are central to Sable's operation of the Santa Ynez Pipeline System.
